

RENZMANN

Distillation unit ROTomaX

Distillation of solvent or
aqueous media

SAVE MONEY

- ▶ Quick ROI - on average 1.5 years
- ▶ Recovery rate of up to 95% and more* possible
- ▶ No expensive solvent disposal

SAVE TIME

- ▶ Extensive data output and optimal parameter settings

SAVE EFFORT

- ▶ Highest degree of automation thanks to intelligent load cell design

*Dependent on solvent

Why ROTOmaX?

EFFICIENT RECOVERY:

Load cells for maximum automation and efficiency (~95%).
Rotating stirring and scraping mechanism (bronze) with direction change for easy draining.
Flat boiler bottom for optimal heat distribution and more consistent thickening.
Real performance data available.

SAFE USE:

Explosion protection according to ATEX, category 1 (with type examination) for zone 0 inside, category 2 for zone 1 outside the machine.
Liquid jet pump for maximum safety.

ROBUST DESIGN:

High-quality components like pumps and ventilators.
Long life cycle with regular maintenance.

1 Type-tested for Ex-Zone 0 inside

2 Rotating Scraper system

3 Loadcell technology
