Combine washing and
distilling

Why a drawing/draining station ZEL?

EFFICIENT CLEANING:

Optional: Cleaning of buckets, cans, or tins after emptying with a cleaning brush flushed with solvent.

EASY HANDLING:

Ergonomic working height. Pneumatic foot switch for starting the solvent flow.

SAFE USE:

Connection to exhaust system (existing air extraction system or as an accessory) protects the operator and minimizes solvent emissions. Suitable for use in hazardous areas.

ROBUST DESIGN:

High-quality components for a long life cycle.

Accessory

- Exhaust ventilator
- Solvent-fed cleaning brush
- Discharge into and filling from drum
- Clean solvent from external pump
- Drying cabinet for cleaning rags
- Collecting pan to prevent contamination
- Enclosure for installation in non-explosion-proof areas

*Efficient, low-emission and ergonomic working for your employees
with a drawing/draining station ZEL*
